

Pharma Packaging

From small batches to full production: Topload as a service

Reliable, sustainable, and scalable secondary packaging for pharmaceutical and healthcare products.

In the pharmaceutical and healthcare industry, time to market is critical when launching a new product or conducting a clinical trial. A common bottleneck is the design, setup, and implementation of specialized packaging machinery for topload products such as blisters, glass vials, or other irregularly shaped items.

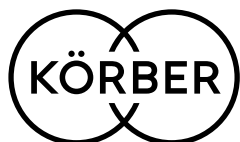

From trials to peaks: Körber Topload service

At Körber, we provide full-service packaging solutions, covering secondary packaging and combination products such as leaflets and labels for every lot size. Our flexible service model ranges from manual to semi-automatic and fully-automatic erecting solutions.

From small batches for clinical trials and product launches to scalable support for production peaks, the Körber Topload service ensures reliable, compliant, and cost-efficient erection of topload packaging for pharmaceutical and healthcare products.

Advantages of the Topload service

- **Cost savings:** Investment in a topload machine can be postponed if the volume is still uncertain.
- **Flexibility:** Fast response for small batches, trials, or production peaks.
- **Speed to market:** External services accelerate launches.
- **Sustainability:** Less plastic and optimized monomaterial packaging.

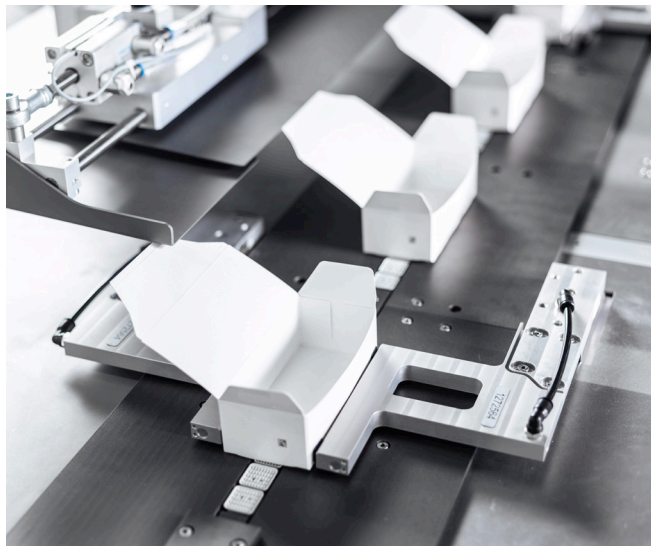

Pharma Packaging

Reliable, compliant, ready for every batch

Topload offers significant benefits, including optimized product protection, and precise product placement. With Körber as your external service provider, you also benefit from increased flexibility and efficiency, without the cost or complexity of investing in new equipment or retooling for small batches.

Our service acts as a strategic bridge to de-risk product launches, marketing studies, and clinical trials, and can also provide support during production peaks for customers with an existing line. Körber's unique topload packaging service provides immediate access to automated packaging, and is configurable to suit customer needs.

“We provide access to world-class automation on demand, backed by a global service network. This empowers our partners with the agility to launch, test, and scale – without the risk of capital expenditure.”

We are your packaging partner

Our customers benefit from our long-term experience in pharmaceutical packaging and our holistic ecosystem that helps our customers reduce complexity and risk while growing their business.

- **Highly scaleable without changing product packaging**
- **Sustainable design that can save up to 50% of packaging volume**
- **Ergonomic easy-to-open cartons for improved product handling**
- **World-wide network for hands-on regional support across Europe and North America**

Our Topload services at a glance

Manual erecting service

Our hand assembly for complex and unique constructions is ideal for small batches, clinical trials, and marketing samples.

Semi-automatic erecting service

We offer a flexible blend of automated and manual processes for medium-sized runs and products requiring careful handling.

Fully-automatic erecting service

Our in-house Dividella NeoTOP lines can be used for high-volume production and managing demand peaks with maximum efficiency.
