

News Release

Shanghai Wellthinic Technology certified as new “PAS-X Endorsed Service Partner Local” for the support of MES/automation implementation in People’s Republic of China

Werum IT Solutions and Chinese-based Shanghai Wellthinic Technology signed a partnership agreement to benefit from complementing PAS-X MES implementation by delivering and integrating automation systems such as SCADA or DCS as well as additional resources during PAS-X implementation projects

Shanghai, People’s Republic of China, 29 October 2018 – Good news for pharma and biotech manufacturers in China: Werum IT Solutions further expands and complements its PAS-X Service Partner network. The world’s leading supplier of manufacturing execution systems (MES) signed a partnership agreement with Shanghai Wellthinic Technology. Based in Shanghai with several local offices in China, Shanghai Wellthinic Technology is a leading IT solutions provider to the Chinese life science industry with focus on automation systems and MES.

As a certified “PAS-X Endorsed Service Partner Local”, Shanghai Wellthinic Technology will support Werum customers in the People’s Republic of China with the on-site-implementation of Werum’s PAS-X MES and automation systems. For instance, Wellthinic will provide resources for project management, MBR design, system configuration, installation, training as well as the implementation and integration of automation and equipment.

“We selected Wellthinic amongst many candidates based on their years of experience in the life sciences industry and because of their complementary capabilities on ISA-Level 2 systems” says Torsten Isenberg, Senior Director Services at Werum IT Solutions. “Wellthinic has an excellent reputation in China and successfully managed a wide range of services – from single-site projects up to large roll-outs. Furthermore, Wellthinic’s management has

been working with foreign companies for decades hence being able to greatly bridge our cultural differences. Therefore, Wellthinic will provide our pharma and biotech customers with high-quality services and support for the years to come.”

Paul Dong, CEO of Shanghai Wellthinic Technology: “Wellthinic’s long experience in offering IT solutions to the pharmaceutical market offers Werum and its customers a stable and reliable partner for the implementation of PAS-X MES. With our deep understanding of the daily operations in the industry, we can perform the transition from a paper-based to a digital-based quality control system more efficiently and in high quality.”

PAS-X Endorsed Service Partners meet all requirements of Werum’s PAS-X Service Partner Program. The main objective is to offer the same quality and competence of services to Werum customers all over the world – through reliable, experienced and certified partners. The Service Partners need to have comprehensive PAS-X knowledge, participate at PAS-X trainings on a regular basis, possess experience in the regulated industry and use a quality management system. The certification has to be renewed on a regular basis.
