MES project excellence & implementation support: prime4services and Werum IT Solutions enter service partnership

Customers benefit from independent consulting and experience in the field of MES, Track & Trace and OEE implementation / Scalable and supplementary services to support PAS-X MES implementation / "PAS-X Endorsed Service Partner" for Europe

Lüneburg, Germany, 4 June 2019 – Werum IT Solutions further extends its range of services: prime4services has been successfully certified as "PAS-X Endorsed Service Partner" for Europe. This qualifies prime4services to support pharma and biotech manufacturers during the implementation phase of Werum's PAS-X Manufacturing Execution System (MES) at production sites in the DACH region and Italy. prime4services is a service provider for independent consulting, engineering & IT services to optimize both quality and efficiency and to drive manufacturing excellence at the customer's site.

"prime4services helps us further improve and expand support services for our European customers, in particular in Italy," Torsten Isenberg, Senior Director Services at Werum IT Solutions GmbH, is pleased to announce. "As PAS-X Endorsed Service Partner, prime4services provides independent consultancy services – typically at the customer's – and thus enhances Werum's service portfolio for our common customer base in a seamless way."

"By combining Werum's and prime4services's expertise, our customers will benefit from the long-term, complementary experience of our two companies. This partnership is a landmark and future-oriented decision for prime4services and Werum. We look forward to an exciting cooperation," says Yasmine Peters, Managing Director at prime4services.

PAS-X Endorsed Service Partners meet all requirements of Werum IT Solutions' PAS-X service partner program. The main objective of our program is to offer the same quality and competence of services to Werum customers all over the world – through reliable, experienced and certified partners. Our service partners need to have comprehensive PAS-X knowledge, participate at PAS-X trainings on a regular basis, possess experience in the regulated industries and use a quality management system. The certification has to be renewed on a regular basis.

About Werum IT Solutions

Werum IT Solutions is the world's leading supplier of manufacturing execution systems (MES) and manufacturing IT solutions for the pharmaceutical and biopharmaceutical industries. Its PAS-X software product is run by the majority of the world's top 30 pharmaceutical and biotech companies but also by many mid-sized manufacturers. Werum's manufacturing IT solutions help pharma manufacturers to increase efficiency, improve productivity, and meet regulatory requirements. Founded in 1969, Werum is headquartered in Lüneburg, Germany, and has many locations in Europe, America, and Asia.
